EXECUTIVE SUMMARY

After 17 years in high-pressure broadcast and motion design, my focus has evolved from crafting individual frames to architecting the systems that scale creativity itself. I leverage Generative AI as a technical force multiplier to design offline, zero-dependency tools that liberate senior creative talent from repetitive bottlenecks. My systems protect enterprise IP, eliminate reliance on unvetted "Shadow IT," and democratize production—enabling non-technical teams to execute secure, high-volume media workflows with zero IT overhead.

SYSTEMS LEADERSHIP & ARCHITECTURE PRINCIPLES

- **Motion as Logic:** Translating visual timing, dependency chains, and precise orchestration into robust software architecture and data flows.
- **AI as the Technical Crew:** Operating as Lead Architect and Final Approver—defining deployment logic and stress-testing edge cases against professional production standards, while LLMs accelerate code execution.
- **Secure Ecosystem Deployment:** Building standalone, air-gapped systems compiled via Nuitka, designed for immediate deployment on enterprise "clean machines" without complex environment setups.

CORE STACK

- **AI & Architecture:** System Topology, LLM-Assisted Engineering (Claude/Gemini), Headless Processing pipelines, Human-in-the-Loop Validation.
- **Systems & Execution:** Python 3.12, JavaScript (ExtendScript), FFmpeg, Native PyAV, CustomTkinter, Nuitka/PyInstaller.
- **Media Pipelines:** AI Audio Restoration (pyrnnoise), Data-Driven Motion Rendering (After Effects Automation), Offline Video/Audio Encoding.

FLAGSHIP PLATFORMS & SYSTEM ARCHITECTURE

Subtitle Studio v5 | The Air-Gapped Production Engine

Architected a zero-dependency standalone suite replacing fragmented video processing and "Shadow IT" converters with a unified, offline-first pipeline.

- **Architecture:** Orchestrated a Python-based pipeline integrating native PyAV, FFmpeg demuxing, and a custom premium audio path (denoise_chunk). Solved complex Nuitka packaging conflicts to ensure 100% portability.
- **The Strategic Pivot:** Replaced commoditized transcription engines with local AI vocal isolation (pyrnoise) to solve the primary remaining manual audio bottleneck in enterprise environments.
- **Impact:** Democratized branded subtitle generation across the organization; delivered secure, air-gapped deployment with zero IT overhead; established 100% independence from traditional NLE tools for processing tasks.

Dynamic Render Pipelines | After Effects Orchestration

Took system architecture directly into the timeline, automating Adobe After Effects to operate as a data-driven render engine for localized rollouts.

- **Architecture:** Orchestrated an AI-generated JavaScript (ExtendScript) pipeline that programmatically parses raw SRT data and injects it directly into pre-rigged AE templates.
- **Impact:** Eliminated hundreds of hours of manual copy-pasting for motion designers; generated fully localized, render-ready project files with zero manual data entry.

EXPERIENCE

PwC Global L&D (SDC Kolkata)

Senior Associate & Studio Lead | 2024 — Present

- Directing high-stakes creative production while architecting the automated systems that scale the studio's operational capacity.
- Designing offline-first tools to protect enterprise IP and reduce manual production effort across global media teams.

- Driving the transition to automation-first workflows, ensuring systems meet strict enterprise security and air-gapped deployment requirements.

Creative Lead UK Video & Animation | 2021 — 2023

- Led production pipelines delivering 300+ global assets annually.
- Managed and scaled a 12-member cross-functional team.
- Contributed to winning In-House Agency of the Year 2021 (IHAF).

Senior Motion Designer & Pipeline Architect | 2017 — 2021

- Built foundational workflows, templates, and production systems.
- Developed proprietary media assets, eliminating external licensing costs.

CNN-News18 (Network18)

Broadcast Graphic Designer | 2015 — 2016

- Delivered real-time graphics in a 24/7 zero-error broadcast environment.

Focus Bangla | Bent Cigarette Productions

Motion Designer | 2008 — 2015

- High-volume broadcast motion design and production.

AWARDS & EDUCATION

Awards

- Quality Perfectionist 2022 (PwC)
- In-House Agency of the Year 2021 (IHAF) — UK Video
- "There is no Box" Innovation Award 2020 (PwC)

Education

- Bachelor of Media Science (2005-2008) — Pailan College of Management & Technology
